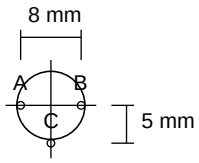
RV1 mechanical fit check - P1

Print at ACTUAL SIZE / 100%. This is NOT a copper mask.

Measured geometry only; wiper and physical pin roles are UNVERIFIED.



Body: diameter 9 mm. Hole centres: A=(-4,0), B=(+4,0), C=(0,+5) mm.

Hole diameter shown: 1.0 mm, assumed; check against the real leads.

Component-side view. A bottom view mirrors A/B; the hole pattern is symmetric.

A/B/C are physical locations, not a manufacturer pinout or wiper identification.

Current CAD mapping (PROVISIONAL): A=pad 1, B=pad 3, C=pad 2.

Do not fabricate before checking the wiper and matching physical pad roles.

Calibration line: exactly 50 mm. Measure this after printing.
